New Courses and Modules - 2013

Human Subjects Research (HSR) Refresher Courses
Series: Human Subjects Research (HSR)
Includes updated and restructured modules that are more closely tied to their corresponding basic modules. Updates included title name changes, a new numbering sequence, content updates, and a change in the term “social and behavioral research (SBR)” to “social, behavioral, and educational (SBE).”

Responsible Conduct of Research (RCR) Refresher Course
Series: Responsible Conduct of Research (RCR)
RCR refresher modules are discipline-neutral and meant to reinforce the importance of concepts covered in a basic RCR course. A recommendation is to complete the RCR Refresher three or four years after completing a basic RCR course but it is up to each organization to determine whether refresher training is appropriate for its learners.

Wildlife Research Course
Series: Animal Care and Use (ACU)
Describes the types of field studies, methods of animal capture, principles and methods of restraint, animal marking, animal transportation and housing, maintenance of wildlife in captivity, translocation and release, animal surgery, blood sample collection recognition and management of pain, and euthanasia involved in wildlife research.

Working with Zebrafish (Danio rerio) in Research Settings Course
Series: Animal Care and Use (ACU)
Discusses the regulatory mandates, humane standards, and husbandry pertinent to common uses of zebrafish in research settings, and provides information about the biological and behavioral features of zebrafish.

Dual Use Research of Concern (DURC) Module
Series: Biosafety and Biosecurity (BSS)
Provides information about the DURC review process including an outline of the agents and toxins that meet DURC criteria, the criteria of research experiments that meet DURC criteria, information available to organizations in identifying DURC, and actions required by an organization when the DURC policy is finalized.

How HITECH has Changed HIPAA Module
Series: Information Privacy and Security (IPS)
Addresses the major changes to HIPAA that derive from provisions of the HITECH Act, and how they may affect privacy and security practices within an organization.

Humanitarian Use Devices (HUDs) Module
Series: Good Clinical Practice (GCP) and Human Subjects Research (HSR)
Provides an overview of the FDA regulations and responsibilities for HUDs, and information for clinicians seeking IRB approval for the clinical use of a HUD on their patients according to its FDA-approved labeling and indication(s), as well as clinical researchers who wish to use a HUD in a clinical investigation. IRB members and administrative staff may also benefit from the module.

Subscription Reminder
Organizational subscriptions provide access to all content in the following series:
- Animal Care and Use (ACU)
- Good Clinical Practice (GCP)
- Human Subjects Research (HSR)
- Information Privacy and Security (IPS)
- Responsible Conduct of Research (RCR)
- Conflicts of Interest (COI)
